Internet-

We like: [urbansurvivalsite.com](http://urbansurvivalsite.com)

There is a LOT of information online, BUT You need to decide who you feel comfortable following and getting advice from.

Locals-

Ask around and find out who is a prepper near you, ask them who they trust, where they get their information from, etc.

Library-

There are so many books out there, available at your local library, or a book can be transferred to your local library from a different one. It might be a good idea to “rent” a book before you buy it (especially if it’s expensive).

There are also many books through services like Audible, Kindle, etc.
